LAP PANELS AND GATES

Lap fencing panels are the most common form of fencing in the UK. But economy doesn't mean a reduction in quality. Our superlap "5&5" panel is one of the most robust on the market, and Lap panels remain the industry standard on new housing developments. The heavy duty nature of its construction makes this panel excellent value for money. Adding a trellis on top adds a decorative touch. Available in Autumn Gold or pressure treated Dark Brown and Green.

Pressure Treated Green

Pressure Treated Brown

LAP PANELS

Product Specifications:

SHROPSHIRE PANELS

The clean looking construction of this panel makes it an ideal border to any contemporary garden. A great alternative to trellis affording that little bit more privacy whilst still maintaining openness. The open slats make this an ideal fence panel for exposed locations too as it allows the wind to pass through easily, pressure treated green. This panel is 70mm thick with a strong construction, making it heavy duty and very sturdy!

It must be remembered that timber is a natural product and it will be subject to natural movement and weathering as it seasons. It is not uncommon for small splits to occur in timber during the drying out process, and for warping to occur when timber is allowed to dry too rapidly. These will normally go back when moisture levels rise. This is nature at work and should not be considered a fault.

All TAFS panels are supplied with a 10 year guarantee against rot, subject to the panel having no direct ground contact. Any alteration to the panel as supplied will negate the guarantee and any warranty provided.
